

3D Printing

Information about INNUNET's Rapid Prototyping service is available at our 3D Printing portal www.prototec.hu in Hungarian language.

While our 3D printing solution is a small service mostly focused on entrepreneurs and innovators from our region and Hungary, we occasionally also take orders from abroad. We manufacture our models by Objet/Stratasys Polyjet printing from UV cured photopolymer by 16 micron layer thickness to a maximum size of 250x250x200 mm.

For further information in English language please contact Balint Vasvari (vbalint@innonet.hu / +36 20 93 28 277)
